57A Week 8 Assignment 57

I) Read <u>Free Response questions 1-5 from the 2005 AP Exam</u>. For each question state the test or statistical concept being assessed and write down a summary of what you would do to answer the question (you can do them if you want).

II) Review the <u>scoring guide</u>, <u>sample student responses</u>, <u>student performance Q&A</u>, and <u>scoring</u> <u>commentary</u>. Then for each question summarize the common errors and omissions students make listed in the Student Performance Q&A and in the Scoring Commentary written at the end of the Sample Responses.

For example:

2005 #1

I) The point of this question is to assess.....

for part (a) I would describe the distribution by talking about the _____ _ and any _____

for part (b) I would comment on whether or not the samples were ______ being sure to list any ______ or potential ______ variables.

for part (c) I would comment on ______ plans then indicate which is better b/c _____

II) common errors and omissions made by students who took the exam include:

(a) * * (b) * * (c) *

2005 #2
